

Laxman Mahto

Jaipur, India | +91 6287669883 | laxmanmahto.cse@gmail.com | [LinkedIn](#) | [GitHub](#)

Full-stack developer with a strong foundation in Java and the MERN stack, experienced in building and deploying production-grade web apps. Hands-on experience in AI/ML including CNNs, computer vision, and model evaluation.

EDUCATION

University of Engineering and Management, Jaipur <i>Bachelor of Technology in Computer Science and Engineering CGPA: 8.0 / 10 (till 5th Semester)</i>	2024 – 2028
Shardha Vidhya Mandir, Jaipur <i>Class XII</i>	2022 – 2024
Raghav World School, Chomu <i>Class X</i>	2019 – 2022

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript, SQL
Frontend: React.js, HTML5, CSS3, Tailwind CSS
Backend: Node.js, Express.js, REST APIs
Databases: MongoDB, PostgreSQL, Firebase, Supabase
AI / ML: PyTorch, CNNs, Computer Vision, Scikit-learn, Pandas, NumPy
Tools & Platforms: Git, GitHub, Vercel, VS Code, Arch Linux

EXPERIENCE

InAmigos Foundation <i>Machine Learning Intern Remote</i>	Aug 2026 – Present
Working on applied machine learning tasks — data preprocessing, model building, and evaluation — collaborating remotely with the team on practical ML problem sets.	

PROJECTS

Multi-Scale Attention-Residual Knee OA Severity Classifier <i>Research Project Python, PyTorch, CNNs, CBAM, Residual Learning, Computer Vision</i>	2026
- Developed a custom five-class knee osteoarthritis severity classifier using parallel multi-scale convolution, CBAM channel-spatial attention, and residual feature fusion, with focal loss, label smoothing, and inverse-frequency sampling to handle class imbalance. - Built a stratified 5-fold training and ensemble inference pipeline with horizontal-flip test-time augmentation (TTA), achieving 66.73% accuracy, 69.68% macro-F1, 0.8473 QWK, and 0.3623 MAE on the evaluated test set. - Performed class-wise error analysis and ordinal evaluation using confusion matrices, precision/recall/F1, QWK, and MAE; benchmarked against a ResNet-152 baseline and analyzed misclassifications between neighboring KL grades. - Research project — IEEE conference paper in preparation.	
ClassGuard <i>React, Vite, Tailwind CSS, Supabase, JavaScript, OpenCV, Scikit-learn</i>	2026
- Built a real-time exam monitoring platform for in-class tests that detects tab switches, split-screen use, and app-switching via the browser Visibility and Fullscreen APIs. - Designed a live teacher dashboard with instant flag alerts and duration tracking using Supabase Realtime, requiring no manual refresh. - Implemented Row Level Security (RLS) across all database tables and secured file storage for photo/PDF question uploads. - Deployed a fully responsive, production-ready app on Vercel with CI-based auto-deployment from GitHub. - GitHub Repo: https://class-guard-five.vercel.app/	
Personal Portfolio <i>React, TypeScript, Tailwind CSS, Vite, Framer Motion</i>	2025
- Designed and built a fully responsive personal portfolio website to showcase projects and skills. - Deployed on GitHub Pages with an automated CI/CD pipeline for continuous updates. - My Portfolio: https://laxman-mahto.github.io/	

POSITIONS OF RESPONSIBILITY

UEM Jaipur ACM Student Chapter & Pradyog Community <i>Tech Core Team Member, ACM Student Chapter — contributing to web development initiatives and technical activities.</i>	Aug 2025 – Present
Active member of Pradyog Community, the college's technical community.
